Disclaimers

- This report (the "Report") is prepared to provide information regarding compliance of the indexes calculated and provided by QUICK Benchmarks Inc. (QBS), with the "Principles for Financial Benchmarks" by the International Organization of Securities Commissions (IOSCO). The recipient of the Report is responsible for the use of this Report and QBS assumes no responsibility.
- The recipient of this Report shall not reproduce and/or reprint without prior consent of QBS.
- This Report is originally prepared in Japanese. The English version is provided for reference purposes. When and if there is a discrepancy between the Japanese and the English versions, the Japanese version should be considered the definitive document.

Section 1. IOSCO Principles and TORF (Tokyo Term Risk Free Rate)

1. Introduction

In July 2013, the International Organization of Securities Commissions (IOSCO) released the final report on "Principles for Financial Benchmarks" ("IOSCO Principles" or the "Principles"). IOSCO states in the report that the Principles are intended to promote the reliability of benchmark determinations and enhance benchmark governance, quality, and accountability mechanisms, and requires indicator operators to disclose their compliance status once a year.

QUICK Benchmarks Inc. (QBS) was established on January 18, 2021 as a subsidiary of QUICK Corp. (QUICK) to calculate and publish the TORF (Tokyo Term Risk Free Rate) production rate, which can be used for trading as a risk-free rate for the Japanese yen. On April 26 of the same year, QBS began calculating and publishing the TORF production rate and has since been working to improve the framework for compliance with the IOSCO Principles. Starting this year, QBS will publish this report with the assurance of Deloitte Touche Tohmatsu LLC (DTTL) regarding the description of design, implementation and the operational status for compliance with the IOSCO Principles. QBS will continue to prepare and publish a report on compliance with the IOSCO Principles on an annual basis.

The details of QBS's responses to each item of the Principles and examinations performed by DTTL are presented in Section 4.

2. The History of TORF

In July 2017, Andrew Bailey, who at that time was serving as Chief Executive Officer of the Financial Conduct Authority (FCA), which oversees LIBOR, announced that he would not exercise the right to enforce the reporting of LIBOR rates for panel banks after the end of 2021. As such, the possibility of a suspension of LIBOR publication after the end of 2021 had rapidly increased.

In light of these circumstances, in August 2018, the "Cross-Industry Committee on Japanese Yen Interest Rate Benchmarks" ("Committee") was established with the Bank of Japan as its secretariat, and the Committee discussed basic ideas and specific issues concerning the appropriate selection and use of Japanese Yen interest rate benchmarks to replace the Japanese Yen LIBOR. The "Final Report on the Results of the Public Consultation on the Appropriate Choice and Usage of Japanese Yen Interest Rate Benchmarks" (published in November 2019), which was based on the opinions received in the consultations on the appropriate choice and usage of Japanese Yen interest rate benchmarks (published in July 2019), showed that, among the five alternatives to the Japanese Yen LIBOR, the term risk free rate, which is characterized by its "fixing in advance formula" showing the interest rate at the beginning of the calculation period, had the greatest support.

Based on the results of the aforementioned report, the Committee decided to calculate and publish the term risk free rate based on the data of the Japanese Yen "Overnight Index Swap (OIS) market" in a phased manner, from calculation and publication of prototype rate (Phase 1) to calculation and publication of the production rate (Phase 2). In October 2019, the Committee conducted a public solicitation for entities to calculate and publish the prototype rate for Phase 1. As a result, it was decided in February 2020 that QUICK would be the entity for calculating and publishing prototype rates, and the weekly publication of the term risk free rate for the Japanese Yen began in May of the same year. In July of the same year, QUICK decided on TORF as the official name for the Japanese Yen term risk free rate, and switched the frequency of updates to daily publication in October while preparing a framework for calculating and publishing TORF.

On January 18, 2021, QUICK established QBS, a subsidiary responsible for calculating and publishing the production rate for Phase 2, and has been working to build governance as an operator of financial indexes. On April 26 of the same year, the calculation and publication of TORF production rate began, and on the following day, April 27, TORF was designated as a "Specified Financial Benchmark" and QBS was designated as a "Specified Financial Benchmark Administrator" under the Financial Instruments and Exchange Act.

In order to calculate and publish the TORF, QBS established the TORF Operational Rules and other rules on April 21, 2021, and these rules were applied since the start of publishing the TORF production rate. After the revision on October 13, 2021, on October 26 of the same year, QBS obtained the approval of the Commissioner of the Financial Services Agency for the Operational Rules and other related rules to operate the TORF calculation and publication.

October, 2021	Received approval from the Commissioner of the Financial Services Agency for related rules, including Operational Rules for the TORF calculation and publication operations (October 26)		

3. Scope of the Benchmarks

TORF (Tokyo Term Risk Free Rate)

- Outright transaction of Japanese Yen OIS (OIS stands for Overnight Index Swap)
- Spot start (starts two business days after the execution of the contract)
- A tenor of 1 month, 3 months, or 6 months
- > 365-day basis
- Transactions during Tokyo business days
- Centrally-cleared transaction (transactions supposed to be cleared at either Japan Securities Clearing Corporation ("JSCC") or LCH Limited)
- Orders valid between 15:00:01 JST on the previous business day and 15:00:00 JST on the current business day
- 4. Basic Policy of QUICK Benchmarks Inc. (QBS) for the IOSCO Principles Based on the IOSCO Principles, QBS will take measures to improve the transparency and fairness of TORF, and will confirm and announce the status of TORF's compliance with the IOSCO Principles once a year.

As a specific measure, QBS have established the TORF Oversight Committee, which is composed of a majority of outside experts, and while ensuring independence and neutrality, QBS have built a governance structure that is responsible for confirming and approving the appropriateness of TORF operations and making recommendations to the Board of Directors on improvement measures.

In addition, as part of its transparency efforts, QBS published the six rules required for calculating and publishing TORF, as well as a TORF Methodology and related materials on our website.

Section 2. Management Statement (TRANSLATION)

Management Statement

January 31, 2022 QUICK Benchmarks Inc. President, CEO Masahiro Sasaki

QUICK Benchmarks Inc. (QBS) is responsible for appropriately implementing and fairly describing the responses to comply with the Principles for Financial Benchmarks published by the International Organization of Securities Commissions dated July 2013 (the "IOSCO Principles").

In addition, QBS is responsible for appropriately designing and effectively operating the responses to comply with the IOSCO Principles.

We express that:

- (a) The accompanying description in Section 4 fairly presents our policies and procedures to comply with the IOSCO Principles during the period from May 24, 2021 to November 30, 2021.
- (b) The responses described in Section 4 to comply with the IOSCO Principles are appropriately designed and effectively operated regarding the Benchmarks described in Section 1 during the period from May 24, 2021 to November 30, 2021.

[The above represents a translation, for convenience only, of the original report issued in Japanese.]

Section 3. Independent Assurance Report

January 31, 2022

To the President and CEO of QUICK Benchmarks Inc. Mr. Masahiro Sasaki

Deloitte Touche Tohmatsu LLC

Designated Engagement Partner, Certified Public Accountant: Nobuyuki Yamada

Designated Engagement Partner, Certified Public Accountant: Tomohiro Goto

Scope

We have been engaged to report on QUICK Benchmarks Inc. (the "Company")'s description in Section 4 related to the design, implementation and operating effectiveness of the responses to comply with the Principles for Financial Benchmarks published by the International Organization of Securities Commissions (the "IOSCO Principles") throughout the period from May 24, 2021 to November 30, 2021 (the "Description") in the form of a reasonable assurance opinion.

Responsibilities of the Company

The Company is responsible for appropriately implementing the responses to comply with the IOSCO Principles and preparing the Description in accordance with the criteria documented in the Management Statement (the "Criteria"). In addition, the Company is responsible for appropriately designing and effectively operating the responses to comply with the IOSCO Principles.

Responsibilities of the Practitioner

Our responsibility is to independently express an opinion to the Description based on the procedures we have performed.

We conducted a reasonable assurance engagement in accordance with International Standard on Assurance Engagements 3000 "Assurance Engagements other than Audits or Reviews of Historical Financial Information" issued by the International Auditing and Assurance Standards Board.

Our reasonable assurance engagement involves performing procedures to understand the Company's responses to comply with the IOSCO Principles and obtain evidence about the suitability of the design, implementation and operating effectiveness of the responses.

The procedures selected and performed depend on our judgment, including the assessment of the risks that the Description is not fairly presented, and that responses are not suitably designed, implemented or operated effectively.

The procedures selected and performed by us are described in Section 4 of the Description as "DTTL Procedures".

Our procedures included testing the operating effectiveness of those responses that we consider necessary to provide reasonable assurance that the Criteria were achieved. Our assurance engagement also includes evaluating the suitability of the Criteria.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our Professional Ethics, Independence and Quality Control

We performed procedures in accordance with the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, where the fundamental principles are established including Integrity, Objectivity and Professional Competence and Due Care, Confidentiality and Professional behavior.

We complied with International Standard on Quality Control 1 "Quality Control for Firms that Perform Audits and Reviews of Historical, Financial Information, and Other Assurance and Related Services Engagement." Accordingly, we maintain a comprehensive system of quality control.

Inherent Limitation

The Company's responses to comply with the IOSCO Principles are not necessarily operated to achieve the Criteria because of their nature and inherent limitation.

Also, the projection of any evaluation of effectiveness to future periods is subject to the risk that the Company's responses may become inadequate or fail.

Opinion

Our opinion has been formed on the basis of the matters outlined in this report. The Criteria we used in forming our opinion are those described in the Management Statement.

In our opinion, in all material respects:

- (a) The Description fairly presents the responses as designed and implemented to comply with the IOSCO Principles throughout the period from May 24, 2021 to November 30, 2021;
- (b) The responses stated in the Description were suitably designed throughout the period from May 24, 2021 to November 30, 2021; and
- (c) The responses stated in the Description were operated effectively throughout the period from May 24, 2021 to November 30, 2021.

Section 4.

QUICK Benchmarks' Responses to Comply with IOSCO Principles

QUICK Benchmarks' Responses to Comply with IOSCO Principles

QUICK Benchmarks, Inc. (hereinafter referred to as "QBS") has listed, in the "QBS's Response" column of the table below, the frameworks for compliance with the IOSCO Principles that were designed, implemented and operated by QBS for the period from May 24, 2021 to November 30, 2021 (hereinafter referred to as the "Applicable Period"), with respect to the index listed in Section 1 of this report.

Deloitte Touche Tohmatsu LLC (hereinafter referred to as "DTTL") has listed, in the "DTTL Procedures" column, the procedures taken to verify that the frameworks listed in "QBS's Response" were designed, implemented and operated as described therein. The "DTTL Procedures" form the basis for the opinions reported in the assurance report in Section 3.

and

d) Governance: Establishing credible and transparent governance, oversight and accountability procedures for the Benchmark determination process, including an identifiable oversight function accountable for the development, issuance and operation of the Benchmark.

etc. are described in the section after the response to Principle 2.

QBS has stipulated in the "TORF Operational Rules" that the definition, the calculation method, and other overall benchmark administration of TORF shall be verified, reviewed, and published at least once a year.

[About d)]

On April 27, 2021, TORF was designated as a "Specified Financial Benchmark" and QBS was designated as a "Specified Financial Benchmark Administrator" under the Financial Instruments and Exchange Act. As a result, OBS is under the regulation and supervision of the Financial Services Agency (FSA) and has established the following related regulations, including the "TORF Operational Rules," which are the operational rules required to be prepared by the Specified Financial Benchmark Administrator. The "TORF Operational Rules" and other related regulations were approved by Commissioner of the Financial Services Agency on October 26, 2021.

- TORF Operational Rules
- TORF Code of Conduct
- Complaints Consultation Management

DTTL reviewed the "TORF Operational Rules" and confirmed that the definition, calculation method, and other benchmark operations of TORF are to be verified, reviewed, and published at least once a year.

[About d)]

DTTL reviewed the "Designation of Specified Financial Benchmark Administrator" and confirmed that TORF was designated as a Specified Financial Benchmark and QBS was designated as a Specified Financial Benchmark Administrator on April 27, 2021.

DTTL also reviewed the "Approval of Operational Rules for Calculation of Specified Financial Benchmark" and confirmed that it was approved by the Commissioner of the Financial Services Agency as of October 26, 2021.

In addition, DTTL reviewed the "TORF Operational Rules," "TORF Code of Conduct," "Complaints Consultation Management Rule of TORF," "TORF Calculation Guidelines," "Conflict of Interest Management Policy for TORF," and "Contingency Plan for TORF Calculation and Publication" and confirmed that each of these rules had been

	 Rule of TORF TORF Calculation Guidelines Conflict of Interest Management Policy for TORF Contingency Plan for TORF Calculation and Publication 	established.
2. Oversight of Third Parties		
Where activities relating to the Benchmark determination process are undertaken by third parties - for example collection of inputs, publication or where a third party acts as Calculation Agent - the Administrator should maintain appropriate oversight of such third parties. The Administrator (and its oversight function) should consider adopting policies and procedures that:	QBS calculates TORF and oversees third parties responsible for data collection and publication. The three Reporting Brokers are responsible for collecting data on derivatives transactions using "uncollateralized overnight call rates" as the underlying asset. Information vendors are responsible for the publication of TORF calculated by QBS and provided to Subscribers.	DTTL reviewed the "TORF Code of Conduct" and confirmed that it defines the role and duties of the Reporting Broker and sets out the Reporting Broker's compliance requirements. DTTL also reviewed the "TORF Operational Rules" and confirmed that the role of the information vendor was defined.
a) Clearly define and substantiate through appropriate written arrangements the roles and obligations of third parties who participate in the Benchmark determination process, as well as the standards the Administrator expects these third parties to comply with;	[About a)] QBS has established the "TORF Code of Conduct," which sets out the requirements to be observed by Reporting Brokers with respect to rate reporting. In the "TORF Code of Conduct," QBS has clarified the roles and obligations of Reporting Brokers and has entered into an information provision agreement with Reporting	[About a)] DTTL reviewed the information provision agreement and other documents and confirmed that QBS had entered into an information provision agreement with Reporting Brokers, that the agreement defines roles and obligations of Reporting Brokers, and that the agreement states that Reporting Brokers complies with the

- Make Available to Stakeholders and any relevant Regulatory Authority the identity and roles of third parties who participate in the Benchmark determination process; and
- d) Take reasonable steps, including contingency plans, to avoid undue operational risk related to the participation of third parties in the Benchmark determination process.

This Principle does not apply in relation to a third party from whom an Administrator sources data if that third party is a Regulated Market or Exchange. "TORF Code of Conduct."

QBS and QUICK Corp. (hereinafter referred to as "QUICK"), an information vendor, have entered into a sales license agreement, and QUICK and other information vendors have entered into redistribution license agreements, thereby clarifying the roles and obligations of information vendors in providing TORF to its Subscribers.

[About b)]

QBS appropriately oversees Reporting Brokers on the appropriateness of their reporting rates and compliance with the Code of Conduct, as described below.

The appropriateness of the reporting rate is regularly monitored on a quarterly basis, and the results are referred to the TORF Oversight Committee to ensure that it is being operated appropriately.

QBS announces the presence or absence of miscalculations on its website on a quarterly basis, taking into account the results of periodic monitoring.

An internal audit by the Reporting Brokers of the Reporting Brokers' compliance with the Code of Conduct was requested in October 2021, and DTTL reviewed the "Sales License Agreement" and confirmed that QBS has entered into a sales license agreement with QUICK Corp., that it defines the roles and obligations of QUICK, and that it states that QUICK may grant redistribution licenses to other information vendors.

[About b)]

DTTL reviewed the TORF Oversight Committee minutes and confirmed that the results of the monitoring of the appropriateness of reporting rates was reported to and confirmed by the TORF Oversight Committee.

In addition, DTTL reviewed the QBS website and confirmed that the "Results of Periodic Monitoring of TORF Official Rates, etc." was published.

In addition, DTTL inquired of the person in charge about the status of compliance with the Code of Conduct for Reporting Brokers and received a response to that QBS plans to respond as described in "OBS's Response."

the TORF Oversight Committee plans to confirm the compliance status by the end of February 2022.

QBS calculates the TORF and distributes the Official Rate and other data directly to QUICK, and through QUICK to other information vendors. Each information vendor publishes the Official Rate, etc. distributed by QUICK on its online service, etc.

QBS has established a system in which those in charge of calculation operations can check the status of QUICK's data distribution through QUICK's online service. In addition, QBS has established a system for mutual communication in the event of problems in the distribution of TORF among information vendors. This oversees that TORF is being successfully provided to Subscribers.

QBS also implements initiatives to improve convenience for Subscribers through regular opinion exchange meetings with major information vendors.

[About c)]

QBS discloses its Reporting Brokers and major information vendors on its website, discloses this information to the Subscribers of TORF and

DTTL reviewed the extracted "operation reports" during the verification period and confirmed that there was no delay of the publication time and that the name of the authorizer was listed in the approval column.

DTTL also reviewed the "List of Contact Information for Information Vendors" and confirmed that the contact information for each of the information vendors was included.

DTTL also reviewed the minutes of the meetings with QBS and the information vendors, confirmed that opinions were exchanged with QBS and the information vendors.

[About c)]

DTTL reviewed the QBS website and confirmed that the Reporting Brokers and information vendors are made public and that the Reporting the FSA.

Both the rate reporting system from the Reporting Brokers and the TORF calculation system are duplexed. Procedures to deal with problems is established, and failure training is conducted.

For the Applicable Period, QBS conducted operational training at QBS in accordance with the contingency plan on November 18, and December 10, 15 and 22.

In the event of an emergency situation, QBS has established a "Contingency Plan for TORF Calculation and Publication," which is published on its website.

Brokers and information vendors listed in "QBS's Response" are consistent with the public information.

[About d)]

DTTL reviewed the "Process Configuration Diagram" and confirmed that the Reporting Broker's rate reporting system and the TORF calculation system are duplexed.

DTTL also reviewed the "Contingency Plan for TORF Calculation and Publication" and confirmed that the procedures for dealing with problems were established.

In addition, DTTL reviewed that the extracted "Operational Training Evaluation Sheet" during the verification period and confirmed that the evaluation sheet contained comments and suggestions for improvement after participating in the operational training.

DTTL reviewed the QBS website and confirmed that the "Contingency Plan for TORF Calculation and Publication" were published. 3. outside directors, and that a majority of the members of the TORF Oversight Committee are not executives or employees of QUICK.

DTTL reviewed the "TORF Operational Rules" and the "Conflict of Interest Management Policy for TORF," and confirmed that it sets out that the TORF Oversight Committee will confirm the review of the definition and other aspects of TORF.

In addition, DTTL inquired of the person in charge and received a response that TORF Oversight Committee plans to confirm the validity of the revision, etc. of TORF definition and calculation method, as described in "QBS's Response."

DTTL reviewed the QBS website and confirmed that the relevant rules of TORF and the "Results of Periodic Monitoring of TORF Official Rates, etc." were published.

DTTL confirmed that no one can enter the dedicated room for calculation without using the IC card.

DTTL also reviewed the "Office Access Card History" and confirmed that no one other than QBS executives and employees had been given

Benchmark.

An Administrator's conflict of interest framework should seek to mitigate existing or potential conflicts created by its ownership structure or control, or due to other interests the Administrator's staff or wider group may have in relation to Benchmark determinations. To this end, the framework should:

- a) Include measures to avoid, mitigate or disclose conflicts of interest that may exist between its Benchmark determination business (including all staff who perform or otherwise participate in Benchmark production responsibilities), and any other business of the Administrator or any of its affiliates; and
- b) Provide that an Administrator discloses conflicts of interests arising from the ownership structure or the control of the Administrator to its Stakeholders and any relevant Regulatory Authority in a timely manner.

- ✓ Access to the dedicated room for calculation is controlled by the IC cards.
- ✓ Critical information is kept in a locked location or on an electronic drive with controlled access.
- QBS executives and employees, as well as members of the TORF Oversight Committee and the Planning and Administration Committee, have submitted to QBS a written pledge not to divulge to any third party any confidential information obtained in connection with QBS's business and not to use such information to benefit themselves or any third party.
- QBS has established a whistle-blowing system for the early detection of fraudulent operations and misconduct related to TORF.

In addition, for Reporting Brokers, the "TORF Code of Conduct" stipulates the establishment of a framework for the appropriate management of conflicts of interest. A system is in place for the TORF Oversight Committee to confirm the appropriateness of the internal audit results related to conflicts of interest based on the internal audit results reported by the Reporting Brokers conducted annually.

cards.

DTTL reviewed the extracted "pledge forms" during the verification period and confirmed that the pledges were written as described in "QBS's Response" and that the submitter's seal was affixed.

DTTL reviewed the screen copy of the QBS internal portal site and confirmed that the "Whistleblower for TORF manipulation" was listed.

DTTL reviewed the "TORF Code of Conduct" and confirmed that it provides for Reporting Brokers to manage conflicts of interest.

DTTL also reviewed the "TORF Operational Rules" and confirmed that the TORF Oversight Committee is responsible for verifying the appropriateness of the Reporting Broker's internal audit results.

In addition, DTTL inquired of the person in

✓ For the Applicable Period, as described in the response to Principle 2, an internal audit by a Reporting Broker were requested in October 2021, and the TORF Oversight Committee plans to confirm compliance with the Code of Conduct by the end of February 2022.

charge and received a response to that QBS plans to respond as described in "QBS's Response" about the status of compliance with the Code of Conduct for Reporting Brokers.

[About b)]

QBS has established the "Guidelines for the Prevention of Insider Trading" to restrict transactions by QBS in financial instruments that use TORF as reference rates. QBS has also received written pledges from its executives and employees, as well as from each member of the TORF Oversight Committee and the Planning and Administration Committee, to comply with these quidelines.

[About c), d), and f)]

QBS has taken the following measures in the calculation of TORF.

- Calculations are performed in a dedicated room where access is restricted by the IC cards.
- The use of private information devices is prohibited in the dedicated room, and only devices in the dedicated room are allowed

[About b)]

DTTL reviewed the "Guidelines for the Prevention of Insider Trading, etc." and confirmed that it is set forth as described in the "QBS's Response."

In addition, DTTL reviewed the extracted "pledge forms" during the verification period and confirmed that the pledges were written as described in "QBS's Response" and that the seal of the submitter was affixed.

[About c), d), and f)]

DTTL confirmed that no one can enter the dedicated room for calculation without using an IC card.

DTTL also reviewed the "Visitor IC Card Records" and confirmed that the IC cards record the lending date, the person who lent the card, and the equipment brought in.

In addition, DTTL reviewed the extracted video

to be used for external communication during calculation hours.

 The status of calculation operations is recorded and stored by surveillance cameras. recordings of the surveillance cameras during the verification period and confirmed that they were recording and storing the status of calculation operations.

In addition, QBS has established the authority and roles of the calculation staff and the authorizer in the TORF calculation process in TORF Operational Rules and the operation manual, has established the approval process for TORF calculation.

The calculation staff checks the validity of the reporting rates by the Reporting Brokers, starting with the operation of the system, receiving files, and deviation from the previous day's adopted rate.

The authorizer checks the work items of the calculation staff, confirms that there is no problem with the reporting rates, and then executes the delivery process by pressing the approve button.

The names of the calculation staff and the authorizer, as well as the status of the day's calculation operations, are recorded and stored in the operation report.

DTTL reviewed the "TORF Operational Rules" and the "Operation Manual", confirmed that the respective authorities and roles of the calculation staff and authorizer are defined.

In addition, DTTL reviewed the extracted "operation reports" during the verification period and confirmed that the authorizer was listed in the approval column and that the status of the day's calculation operations was recorded and saved.

[About e)]

QBS requires each QBS executive and employee, and each member of the TORF Oversight Committee and the Planning and Administration Committee, to submit a written pledge that they do not divulge to any third party any confidential information obtained in the course of QBS's business, and that they do not use such information to benefit themselves or third parties.

[About q)]

"TORF Operational Rules" were established by QBS to ensure the appropriate design and operation of the remuneration system for executives and employees so that the remuneration system is not linked to the level of TORF. QBS also require that QBS executives and employees, as well as members of the TORF Oversight Committee and the Planning and Administration Committee, submit a written pledge that they agree that their remuneration system does not be linked to TORF levels.

QBS has taken the following measures to prevent conflicts of interest with the parent companies such as QUICK.

[About e)]

DTTL reviewed the extracted "pledge forms" during the verification period and confirmed that the pledges were written as described in "QBS's Response" and that the submitter's seal was affixed.

[About g)]

DTTL reviewed the "TORF Operational Rules" and confirmed that the remuneration system for executives and employees is appropriately designed and operated to ensure that it is not linked to TORF's level.

In addition, DTTL reviewed the extracted "pledge forms" during the verification period and confirmed that the pledges were written as described in "QBS's Response" and that the seal of the submitter was affixed.

Conflicts of interest with the parent company, QUICK, etc.

[About a) and b)]

DTTL reviewed the "Conflict of Interest

[About a) and b)]

The "Conflict of Interest Management Policy for TORF" or the internal rules stipulate that QUICK and other parent companies shall report to QBS when they execute financial transactions related to TORF, and that QBS shall monitor the status of such transactions once a year and disclose the results as necessary.

In addition, QUICK is continuously conducting training on insider trading prevention and other topics. As part of this training, QUICK plans to add precautions for trading financial instruments that use TORF as a reference rate from fiscal 2022.

Management Policy for TORF" and confirmed that QUICK reports to QBS when it executes financial transactions related to TORF, and that QBS monitors the status of such transactions once a year and discloses the results as necessary.

DTTL also reviewed QUICK's bylaws and confirmed that they provide for the handling of financial transactions referencing to TORF benchmark.

In addition, DTTL reviewed the "Notification of Financial Transactions Referring to TORF" and confirmed that the parent company reported the presence or absence of financial transactions related to TORF.

DTTL inquired of the person in charge and received a response that QUICK plans to respond as described in "QBS's Response."

4. Control Framework for Administrators

An Administrator should implement an appropriate control framework for the process of determining and distributing the Benchmark. The control framework should be appropriately tailored to the materiality of the potential or existing conflicts of interest identified, the extent of the use of discretion in the Benchmark setting process and to the nature of Benchmark

QBS has established and is operating an appropriate control framework for the process of TORF benchmark determination and publication in the "TORF Operational Rules."

In addition to the Board of Directors, the TORF Oversight Committee, which consists of a majority of lawyers, meets monthly as the core DTTL reviewed the "TORF Operational Rules" and confirmed that the basic rules for the benchmark administration to be used in TORF calculation and publication have been established.

DTTL reviewed the "TORF Operational Rules" and established the TORF Oversight Committee

inputs and outputs. The control framework should be documented and available to relevant Regulatory Authorities, if any. A summary of its main features should be Published or Made Available to Stakeholders.

This control framework should be reviewed periodically and updated as appropriate. The framework should address the following areas:

- a) Conflicts of interest in line with Principle 3 on conflicts of interests;
- b) Integrity and quality of Benchmark determination:
 - i. Arrangements to ensure that the quality and integrity of Benchmarks is maintained, in line with principles 6 to 15 on the quality of the Benchmark and Methodology;
 - ii. Arrangements to promote the integrity of Benchmark inputs, including adequate due diligence on input sources;
 - iii. Arrangements to ensure accountability and complaints mechanisms are effective,

of the governance system. The committee confirms the appropriateness of the overall TORF calculation process and makes recommendations to the Board of Directors as appropriate.

[About a)]

The "TORF Operational Rules" and "Conflict of Interest Management Policy for TORF" have been established to provide a framework for controlling conflicts of interest at QBS.

For details, please refer to the response to Principle 3.

Both regulations also stipulate the establishment of a Code of Conduct to manage conflicts of interest for Reporting Brokers.

[About b)]

The actions taken to maintain the integrity and quality of TORF benchmark determination are described in the responses to Principles 6 through 19.

In order to maintain the quality and integrity of TORF, the following tasks are carried out in the daily calculation process.

Confirmation of normal startup of the

as a committee under the Board of Directors, confirmed the appropriateness of basic matters related to the benchmark administration in TORF calculation and publication, and confirmed that the TORF Oversight Committee recommends improvement measures to the Board of Directors.

DTTL reviewed the extracted minutes of the TORF Oversight Committee meetings during the verification period and confirmed that the TORF Oversight Committee meets to discuss the basic matters related to the benchmark administration in accordance with the TORF calculation and publication.

[About a)]

See Principle 3.

[About b)]

For actions taken to maintain the integrity and quality of TORF benchmark determinations, see "DTTL Procedures" in Principles 6 through 19.

DTTL reviewed the "TORF Checklist" and confirmed that the items to be checked in the daily calculation operations described in "QBS's Response" were included.

DTTL also reviewed the extracted "operation

in line with principles 16 to 19; and

- iv. Providing robust infrastructure, policies and procedures for the management of risk, including operational risk.
- c) Whistleblowing mechanism:

Administrators should establish an effective whistleblowing mechanism to facilitate early awareness of any potential misconduct or irregularities that may arise. This mechanism should allow for external reporting of such cases where appropriate.

d) Expertise:

- i. Ensuring Benchmark determinations are made by personnel who possess the relevant levels of expertise, with a process for periodic review of their competence; and
- ii. Staff training, including ethics and conflicts of interest training, and continuity and succession planning for personnel.

calculation system

- Checking the status of receipt of reporting rates from Reporting Brokers in the calculation system
- Checking the deviation of the reporting rates from the previous day's reporting rate from the Reporting Broker in the calculation system

In addition, as described in the response to Principle 3, the calculation staff and the authorizer perform the confirmation and approval work according to their respective authority and roles.

In addition, as part of risk management for operational risk, etc., a backup system for checking the calculation process, which is independent from the TORF calculation system, is always in operation, and the person in charge of calculation checks both systems. In addition, access to the TORF calculation system is limited to those in charge of calculation operations and system administrators, and a system has been established to ensure appropriate management.

[About c)]

A whistle-blowing office has been established for the early detection of fraudulent operations

reports" for the verification period and confirmed that the authorizers were listed in the approval column.

DTTL reviewed the "Process Configuration Diagram" and confirmed that the TORF calculation system is duplexed.

DTTL also reviewed the list of accounts with access rights and the login screen of the TORF calculation system, confirmed that access rights were set only for the person in charge of calculation operations and the system administrator.

[About c)]

DTTL reviewed the "TORF Operational Rules" and confirmed that a whistle-blowing system

and misconduct related to TORF.

[About d)]

The executives and employees engaged in TORF calculation at QBS are those who have gained experience in specialized information handling departments at information vendors or are experienced in the operation of service systems. In addition, QBS continues to deepen its understanding of the TORF and ensure compliance with the "TORF Operational Rules" and other related regulations, by conducting internal training on laws and regulations related to financial benchmarks and on TORF design. For the Applicable Period, internal training was conducted in four sessions between June 25 and July 1, 2021.

Where a Benchmark is based on Submissions: Administrators should promote the integrity of inputs by:

- a) Ensuring as far as possible that the Submitters comprise an appropriately representative group of participants taking into consideration the underlying Interest measured by the Benchmark;
- b) Employing a system of appropriate measures so that, to the extent possible, Submitters

TORF is calculated by obtaining data from Reporting Brokers on transactions and orders in the Japanese Yen OIS market, which is a market for interest rate swaps that use the average overnight uncollateralized call rate (TONA) as the reference floating rate. The Reporting Broker's reporting rate shall be based on the rate cleared by the Central Counterparty (CCP) as stipulated in the "TORF Code of Conduct" and the "TORF Calculation Guidelines." This is in line with regulated markets. For this reason, QBS

had been established.

DTTL reviewed a copy of the screen of the QBS internal portal site and confirmed that the "Whistle-blowing point for TORF-related illegal operations, etc." was listed.

[About d)]

DTTL inquired of the person in charge and received a response that the executives and employees engaged in TORF calculation operations are as described in "QBS's Response."

DTTL also reviewed the "internal training schedule reservation sheet," "internal training materials," and "internal training attendance questionnaire" and confirmed that internal training was being conducted.

DTTL reviewed the "TORF Code of Conduct" and the "TORF Calculation Guidelines," and confirmed that the definition of TORF is set forth in "QBS's Response." comply with the Submission guidelines, as defined in the Submitter Code of Conduct and the Administrators' applicable quality and integrity standards for Submission;

c) Specifying how frequently Submissions should be made and specifying that inputs or Submissions should be made for every Benchmark determination; and

Establishing and employing measures to effectively monitor and scrutinize inputs or Submissions. This should include precompilation or pre-publication monitoring to identify and avoid errors in inputs or Submissions, as well as ex-post analysis of trends and outliers.

does not consider TORF to be an interest rate benchmark which is based on submissions.

However, in order to manage existing or potential conflicts of interest and ensure data integrity, QBS requires Reporting Brokers to comply with the Code of Conduct, as described in the response to Principle 3. In addition, as described in the response to Principle 2, QBS conducts regular monitoring on a quarterly basis, and analyze and verify the Reporting Broker's reporting data after the fact.

✓ For the Applicable Period, in the periodic monitoring, some errors were found in the reporting data by the Reporting Broker on June 9, 2021. Although this did not result in a revision of the Official Rate, it was an error in the reporting data that resulted in a miscalculation. QBS has reminded all Reporting Brokers to deal with the problems in accordance with the TORF Operational Rules, and report accurate data in accordance with the TORF Code of Conduct.

For compliance with the Code of Conduct for Reporting Brokers, see "DTTL Procedures" in Principle 3.

For the ex-post analysis and verification of the Reporting Broker's reporting data, see "DTTL Procedures" in Principle 2.

DTTL reviewed the "Results of Periodic Monitoring of TORF Official Rates, etc." on the QBS website and confirmed that the description of the results of periodic monitoring is consistent with the description of the "QBS's Response." In addition, DTTL inquired of the person in charge and received a response that QBS had alerted the Reporting Brokers as described in "QBS's Response."

5. Internal Oversight

Administrators should establish an oversight function to review and challenge all aspects of the Benchmark determination process.

This should include consideration of intended, expected or known usage of the Benchmark and

Under the "TORF Operational Rules," QBS has established the TORF Oversight Committee, the majority of whose members are not executives or employees of QUICK, and consists of experts (lawyers, certified public accountants,

DTTL reviewed the "TORF Operational Rules" and confirmed that the TORF Oversight Committee is set up as described in "QBS's Response."

the materiality of existing or potential conflicts of interest identified.

The oversight function should be carried out either by a separate committee, or other appropriate governance arrangements. The oversight function and its composition should be appropriate to provide effective scrutiny of the Administrator. Such oversight function could consider groups of Benchmarks by type or asset class, provided that it otherwise complies with this Principle.

An Administrator should develop and maintain robust procedures regarding its oversight function, which should be documented and available to relevant Regulatory Authorities, if any. The main features of the procedures should be Made Available to Stakeholders. These procedures should include:

- a) The terms of reference of the oversight function;
- b) Criteria to select members of the oversight function;
- c) The summary details of membership of any

academics, etc.) who do not belong to financial institutions or Reporting Brokers. The Operational Rules set forth that QBS makes confirmations and recommendations of the appropriateness of the TORF benchmark determination process to the Board of Directors. These "TORF Operational Rules" are published on its website.

[About a)]

- The TORF Oversight Committee meets four times a year as a general rule, with successive meetings held as necessary.
- The reporting data by Reporting Brokers for TORF calculation is monitored on a quarterly basis to ensure its appropriateness.
- The results of annual internal audits conducted by Reporting Brokers are reviewed to confirm compliance with the Code of Conduct.

✓ For the Applicable Period, as described in the response to Principle 2, an internal audit by a Reporting Broker was requested in October 2021, and the TORF Oversight Committee plans to confirm compliance with the Code of Conduct by the end of February 2022. DTTL reviewed the QBS website and confirmed that the "TORF Operational Rules" was published.

[About a)]

DTTL reviewed the extracted minutes of TORF Oversight Committee meetings during the verification period and confirmed that TORF Oversight Committee meetings were held.

DTTL reviewed the TORF Oversight Committee minutes and confirmed that the results of the monitoring of the appropriateness of reporting rates were reported to and confirmed by the TORF Oversight Committee.

DTTL inquired of the person in charge about the status of compliance with the Code of Conduct for Reporting Brokers and received a response that QBS plans to respond as described in "OBS's Response."

DTTL inquired of the person in charge and

committee or arrangement charged with the oversight function, along with any declarations of conflicts of interest and processes for election, nomination or removal and replacement of committee members.

The responsibilities of the oversight function include:

- a) Oversight of the Benchmark design:
 - i. Periodic review of the definition of the Benchmark and its Methodology;
 - ii. Taking measures to remain informed about issues and risks to the Benchmark, as well as commissioning external reviews of the Benchmark (as appropriate);
 - iii. Overseeing any changes to the Benchmark Methodology, including assessing whether the Methodology continues to appropriately measure the underlying Interest, reviewing proposed and implemented changes to the Methodology, and authorizing or requesting the Administrator to undertake a consultation with Stakeholders where known or its Subscribers on such changes

 Based on the results of the annual review of the TORF definition and calculation method, as well as external opinions including complaints and consultations, the TORF benchmark determination process is reviewed.

✓ For the Applicable Period, as described in the response to Principle 3, QBS started the verification of the review of the TORF definition and calculation method from October 2021 with the evaluation period until the end of 2021, and the results are planned to be announced by the end of February 2022.

 In the process of confirming each of the above, if there are matters that need to be improved, QBS proposes the details to the Board of Directors as necessary.

[About b) and c)]

The members of the TORF Oversight Committee are selected each year by the Board of Directors from executives and employees of QUICK, lawyers, certified public accountants, academics, market professionals, and others with expertise in related laws and regulations, accounting, auditing, corporate governance, etc.

received a response that the TORF Oversight Committee plans to confirm the validity of the revision, etc. of TORF definition and calculation method, as described in "QBS's Response."

[About b) and c)]

DTTL reviewed the "TORF Operational Rules" and confirmed that the members of the TORF Oversight Committee are defined as described in "QBS's Response."

as per Principle 12; and

- iv. Reviewing and approving procedures for termination of the Benchmark, including guidelines that set out how the Administrator should consult with Stakeholders about such cessation.
- b) Oversight of the integrity of Benchmark determination and control framework:
 - i. Overseeing the management and operation of the Benchmark, including activities related to Benchmark determination undertaken by a third party;
 - ii. Considering the results of internal and external audits, and following up on the implementation of remedial actions highlighted in the results of these audits; and
 - iii. Overseeing any exercise of Expert Judgment by the Administrator and ensuring Published Methodologies have been followed.

Where conflicts of interests may arise in the

- From the perspective of ensuring independence, the majority of the board members are not executives or employees of QUICK.
- From the perspective of preventing conflicts of interest, QBS does not appoint members who belong to financial institutions, Reporting Brokers, or other companies in the same industry.
- Upon assuming office as a member of the TORF Oversight Committee, the members shall declare to QBS whether or not they have any conflicts of interest with respect to the business conducted by QBS, and if so, the nature of such conflicts. The same applies if there is any change in these matters after the appointment. In addition, members with conflicts of interest with respect to TORF Oversight Committee voting are not included in the voting.

The TORF Oversight Committee fulfills its responsibilities by exercising oversight over TORF in general.

[About a)]

The TORF Oversight Committee has the

Quality of the Benchmark

6. Benchmark Design

The design of the Benchmark should seek to achieve, and result in an accurate and reliable representation of the economic realities of the Interest it seeks to measure, and eliminate factors that might result in a distortion of the price, rate, index or value of the Benchmark.

Benchmark design should take into account the following generic non-exclusive features, and other factors should be considered, as appropriate to the particular Interest:

- a) Adequacy of the sample used to represent the Interest;
- b) Size and liquidity of the relevant market (for example whether there is sufficient trading to provide observable, transparent pricing);
- Relative size of the underlying market in relation to the volume of trading in the market that references the Benchmark;
- d) The distribution of trading among Market Participants (market concentration);
- e) Market dynamics (e.g., to ensure that the

The value measured by TORF is the term interest rate based on the Japanese Yen "risk free rate." By using the Japanese yen OIS (interest rate swap transactions that use the average Japanese yen uncollateralized overnight call rate as the reference floating rate) market, as defined in the "TORF Operational Rules" and the "TORF Calculation Guidelines," as a valuation target, TORF is designed to accurately and reliably reflect the economic reality of its value.

The main feature of TORF is that it uses the transaction rate of the Japanese Yen OIS market, rather than an interest rate benchmark that relies on the rate submitted by the panel banks. In addition, TORF has the following features to more accurately calculate rates objectively and mechanically without using expert judgment.

- QBS uses execution data traded in the Japanese Yen OIS market and quote data presented to Reporting Brokers.
- The rates reported by Reporting Brokers assume centrally-cleared transaction for both execution data and quote data.
- In addition, QBS has adopted the Waterfall

DTTL reviewed the "TORF Operational Rules" and the "TORF Calculation Guidelines," and, confirmed that the definition of TORF is set forth as described in "QBS's Response."

DTTL reviewed the "TORF Calculation Guidelines" and confirmed that execution data, quote data and the calculation method of the Waterfall Methodology are specified as described in "QBS's Response."

DTTL reviewed the QBS website and confirmed that the "TORF Calculation Guidelines" was published.

Benchmark reflects changes to the assets underpinning a Benchmark).

Methodology as its calculation method, have set the priority so that the execution rate at which the actual trading was conducted would be given the highest priority, and incorporated calculation logic such as outlier exclusion at the 25th percentile in the execution data and quality weighted average using the spread between Bid and Offer, thus excluding the distortion that arises to the value of TORF.

The details of the Waterfall Methodology are set forth in the "TORF Calculation Guidelines," which are published on its website.

[About a)]

The Japanese Yen OIS transactions brokered by Reporting Brokers accounts for the majority of the Japanese Yen OIS market transactions observable in the market, and QBS believes that it is sufficient to satisfy the adequacy of the sample used.

[Regarding b), c), d), and e)]

The QBS analysis and verification of the size and liquidity of the Japanese yen OIS market in its periodic monitoring has revealed that the Japanese yen OIS market is steadily expanding,

[About a)]

DTTL reviewed material on the sufficiency of the proportion of transactions accounted for by Reporting Brokers in the Japanese Yen OIS market and confirmed that QBS had been considering the adequacy of the sample used.

[Regarding b), c), d), and e)]

DTTL reviewed the extracted periodic monitoring documents during the verification period and confirmed that QBS had been considering as described in "QBS's Response."

having observable Bona Fide, Arms-Length		

Transactions.

This does not mean that every individual Benchmark determination must be constructed solely of transaction data. Provided that an active market exists, conditions in the market on any given day might require the Administrator to rely on different forms of data tied to observable market data as an adjunct or supplement to transactions.

Depending upon the Administrator's Methodology, this could result in an individual Benchmark determination being based predominantly, or exclusively, on bids and offers or extrapolations from prior transactions. This is further clarified in Principle 8.

Provided that subparagraphs (a) and (b) above are met, Principle 7 does not preclude Benchmark Administrators from using executable bids or offers as a means to construct Benchmarks where anchored in an observable market consisting of Bona Fide, Arms-Length transactions.

This Principle also recognizes that various indices may be designed to measure or reflect the performance of a rule-based investment

- Monthly frequency of each level determined by the Waterfall Methodology described in the response to Principle 8.
- TORF Official Rate determined by the Waterfall Methodology described in the response to Principle 8 and rate trends for each level
- Number of execution rates and quote rates reported by the Reporting Broker
- Rate trends of TORF, clearing price published by JSCC, and TIBOR

In addition, in the event that there is no data available from Reporting Brokers due to market conditions, etc., the "TORF Calculation Guidelines" stipulate a rule that the previous day's data shall be used, which is published on its website.

DTTL reviewed the "TORF Calculation Guidelines" and confirmed that it stipulates that if there is no data available from the Reporting Broker, the previous day's data is used.

DTTL also reviewed the QBS website and confirmed that the "TORF Calculation Guidelines" was published.

strategy, the volatility or behaviour of an index or market or other aspects of an active market. Principle 7 does not preclude the use of nontransactional data for such indices that are not designed to represent transactions and where the nature of the index is such that nontransactional data is used to reflect what the index is designed to measure. For example, certain volatility indices, which are designed to measure the expected volatility of an index of securities transactions, rely on nontransactional data, but the data is derived from and thus "anchored" in an actual functioning securities or options market.

8. Hierarchy of Data Inputs

An Administrator should establish and Publish or Make Available clear guidelines regarding the hierarchy of data inputs and exercise of Expert Judgment used for the determination of Benchmarks. In general, the hierarchy of data inputs should include:

- a) Where a Benchmark is dependent upon Submissions, the Submitters' own concluded arms-length transactions in the underlying interest or related markets;
- b) Reported or observed concluded Arm's-

QBS has adopted a Waterfall Methodology in the TORF benchmark determination based on the "Public Consultation on the Appropriate Choice and Usage of Japanese Yen Interest Rate Benchmarks" released by the "Cross-Industry Committee on Japanese Yen Interest Rate Benchmarks" in July 2019 as a result of its deliberations.

The Waterfall Methodology adopted by TORF is based on the certainty of data observed in the Japanese Yen OIS market by Reporting Brokers, and the level of data is judged as follows.

DTTL reviewed the "TORF Calculation Guidelines" and confirmed that the Waterfall Methodology adopted by TORF is set forth as described in "QBS's Response."

In addition, DTTL reviewed the extracted documents related to the calculation process of TORF during the verification period and confirmed that TORF was calculated in accordance with the "TORF Calculation Guidelines."

DTTL reviewed the QBS website and confirmed that the "TORF Calculation Guidelines" was

length Transactions in the underlying interest;

- c) Reported or observed concluded Arm'slength Transactions in related markets;
- d) Firm (executable) bids and offers; and
- e) Other market information or Expert Judgments.

Provided that the Data Sufficiency Principle is met (i.e., an active market exists), this Principle is not intended to restrict an Administrator's flexibility to use inputs consistent with the Administrator's approach to ensuring the quality, integrity, continuity and reliability of its Benchmark determinations, as set out in the Administrator's Methodology. The Administrator should retain flexibility to use the inputs it believes are appropriate under its Methodology to ensure the quality and integrity of its Benchmark. example, For certain Administrators may decide to rely upon Expert Judgment in an active albeit low liquidity market, when transactions may not be consistently available each day. IOSCO also recognizes that there might be circumstances (e.g., a low liquidity market) when a confirmed

Level 1: Executed transaction (execution) data

Level 2: Order data with the transaction price and notional amount quoted on CLOB

Level 3: Order data where the transaction price and notional amount for both Bid and Offer side are quoted at the same time

Level 4: Order data for either Bid or Offer side with the transaction price and notional amount quoted

Level 5: Order data for both Bid and Offer side with transaction price only.

The order data with the transaction price and notional amount quoted on CLOB, corresponding to Level 2, is not currently being used.

The TORF calculation follows this Waterfall Methodology calculation method, with the highest level of data being given priority. In addition, no expert judgment was used in the TORF calculation.

For details, QBS has published the "TORF Calculation Guidelines" on its website.

published.

bid or offer might carry more meaning than an outlier transaction. Under these circumstances, non-transactional data such as bids and offers and extrapolations from prior transactions might predominate in a given Benchmark determination. 9. Transparency of Benchmark Determinations The Administrator should describe and publish As described in the response to Principle 6, OBS with each Benchmark determination, to the uses a computer system to calculate TORF extent reasonable without delaying an based on the reporting rates by Reporting Administrator publication deadline: Brokers. TORF is then published to Subscribers through the services of information vendors. a) A concise explanation, sufficient to facilitate a Stakeholder's or Market Authority's ability to [About a)] [About a)] understand how the determination was • The terms used to refer to the calculation DTTL reviewed the "TORF Calculation developed, including, at a minimum, the size Guidelines" and the "TORF Methodology", policy are described in the "TORF and liquidity of the market being assessed Calculation Guidelines" and the "TORF confirmed that the terms referring to the (meaning the number and volume of Methodology." calculation policy were described. transactions submitted), the range and average The TORF calculation process is described volume and range and average of price, and in the "TORF Calculation Guidelines," and DTTL reviewed the "TORF Calculation Guidelines" and confirmed that it describes the indicative percentages of each type of market the TORF publication process is described data that have been considered in a Benchmark in the "TORF Operational Rules" and the TORF calculation process. determination; terms referring to the pricing "Policy on Treatment of Revisions to TORF Methodology should be included Official Rates, etc.," both of which are DTTL reviewed the "TORF Operational Rules" (i.e., transaction-based, spread-based published on its website. and the "Policy on Treatment of Revisions to or • The size and liquidity of the Japanese yen TORF Official Rates, etc.", confirmed that the interpolated/extrapolated); OIS market, including the trading volume TORF publication process is described. b) A concise explanation of the extent to which and price range and their averages, are

and the basis upon which Expert Judgment if any, was used in establishing a Benchmark determination. disclosed in the annual periodic review as described in the response to Principle 10.
✓ For the Applicable Period, QBS started the verification of the review of the definition and calculation method of TORF from October 2021 with the evaluation period until the end of 2021, and the results are planned to be announced by the end of February 2022.

In addition, DTTL reviewed the QBS website and confirmed that the "TORF Calculation Guidelines," "TORF Operational Rules" and "Policy on Revisions to TORF Official Rates, etc." were published.

DTTL inquired of the person in charge and received a response that the TORF Oversight Committee plans to confirm the validity of the revision, etc. of TORF definition and calculation method, as described in "QBS's Response."

[About b)]

In the calculation of TORF, as described in the response to Principle 8, no expert judgment was used.

[About b)]

DTTL inquired of the person in charge and received a response that no expert judgment was used in the TORF calculation.

10. Periodic Review

The Administrator should periodically review the conditions in the underlying Interest that the Benchmark measures to determine whether the Interest has undergone structural changes that might require changes to the design of the Methodology.

The Administrator also should periodically review whether the Interest has diminished or is non-functioning such that it can no longer function as the basis for a credible Benchmark.

QBS has established the review of the definition and calculation method of TORF based on periodic review of the conditions in underlying Interest that TORF measures in the "TORF Operational Rules."

QBS conducts regular monitoring of reporting rates on a quarterly basis, collect and analyze basic data that can be used to make decisions in order to respond to changes in the market environment and the needs of Subscribers.

DTTL reviewed the "TORF Operational Rules" and confirmed that they provide for a review of the definition and calculation method of TORF.

DTTL reviewed the TORF Oversight Committee minutes and confirmed that the results of the monitoring of the appropriateness of reporting rates were reported to and confirmed by the TORF Oversight Committee.

The Administrator should Publish or Make Available a summary of such reviews where material revisions have been made to a Benchmark, including the rationale for the revisions.

In addition, the Planning and Administration Committee verifies and reviews the definition, the calculation method, and the overall administration of TORF calculation, taking into account the opinions of external parties to the QBS.

For the Applicable Period, there were no external opinions regarding the definition and the calculation method of TORF, and the overall administration of TORF calculation and approval.

The status of verification and review by the Planning and Administration Committee is reported to the TORF Oversight Committee at least once a year. The TORF Oversight Committee confirms the contents of these reports and recommends improvement measures to the Board of Directors as necessary.

For the Applicable Period, QBS has been working on the verification and review since October 2021, and the results are planned to be announced on its website by the end of February 2022, regardless of whether or not the definition and calculation method of TORF are changed.

DTTL inquired of the person in charge and received a response that there were no external opinions regarding the definition of TORF, the calculation method, and the overall operation of TORF calculation and approval.

DTTL inquired of the person in charge and received a response that the TORF Oversight Committee plans to confirm the validity of the revision, etc. of TORF definition and calculation method, as described in "QBS's Response."

Quality of the Methodology

11. Content of the Methodology

The Administrator should document and Publish or Make Available the Methodology used to make Benchmark determinations.

The Administrator should provide the rationale for adopting a particular Methodology. The Published Methodology should provide sufficient detail to allow Stakeholders to understand how the Benchmark is derived and to assess its representativeness, its relevance to particular Stakeholders, and its appropriateness as a reference for financial instruments.

At a minimum, the Methodology should contain:
a) Definitions of key terms;

- b) All criteria and procedures used to develop the Benchmark, including input selection, the mix of inputs used to derive the Benchmark, the guidelines that control the exercise of Expert Judgment by the Administrator, priority given to certain data types, minimum data needed to determine a Benchmark, and any models or extrapolation methods;
- c) Procedures and practices designed to

As described in the response to Principle 9, QBS has published its TORF calculation policy in the "TORF Calculation Guidelines."

[About a)]

In the "TORF Operational Rules" and the "TORF Calculation Guidelines," QBS provides definitions of key terms. As a complement to these regulations, the "TORF Methodology" provides definitions of terms necessary for the calculation.

[About b)]

QBS has established the "TORF Operational Rules," "TORF Calculation Guidelines," and "Policy on Treatment of Revisions to TORF Official Rates, etc." as the standards and procedures for calculating TORF. As described in the response to Principle 10, the process for reviewing the definition and calculation method of TORF is set out in the "TORF Operational Rules" as follows.

 The Planning and Administration Committee shall verify and review the definition and the calculation method of

DTTL reviewed the "TORF Calculation Guidelines" and confirmed that the TORF calculation policy was established.

[About a)]

DTTL reviewed the "TORF Operational Rules," the "TORF Calculation Guidelines," and the "TORF Methodology" and confirmed that the terms were defined.

[About b)]

DTTL reviewed the "TORF Operational Rules," "TORF Calculation Guidelines," and "Policy on Treatment of Revisions to TORF Official Rates, etc." and confirmed that the standards and procedures for TORF calculation have been established.

DTTL reviewed the "TORF Operational Rules" and confirmed that the definition and calculation method of TORF have been reviewed as described in "QBS's Response."

DTTL inquired of the person in charge and

promote consistency in the exercise of Expert Judgment between Benchmark determinations;

- d) The procedures which govern Benchmark determination in periods of market stress or disruption, or periods where data sources may be absent(e.g., theoretical estimation models);
- e) The procedures for dealing with error reports, including when a revision of a Benchmark would be applicable;
- f) Information regarding the frequency for internal reviews and approvals of the Methodology. Where applicable, the Published Methodologies should also include information regarding the procedures and frequency for external review of the Methodology;
- g) The circumstances and procedures under which the Administrator will consult with Stakeholders, as appropriate; and
- h) The identification of potential limitations of a Benchmark, including its operation in illiquid or fragmented markets and the possible concentration of inputs.

TORF, and the overall operation of the benchmark based on the opinions received from external parties, and report to the TORF Oversight Committee at least once a year.

- The TORF Oversight Committee shall confirm the contents of the report from the Planning and Administration Committee and recommend improvement measures to the Board of Directors as necessary.
- The Board of Directors shall direct the necessary actions based on the recommendations from the TORF Oversight Committee, and shall decide and announce the details of such actions.
- In considering changes to the definition and calculation method of TORF, QBS shall take into account whether there is any material change (i.e., a change that is reasonably expected to significantly alter the homogeneity of TORF before the change or significantly affect the level of TORF rates). In the event that a change is deemed to be a material change, QBS calls for public comments, etc. and consult with Stakeholders as necessary.
- In seeking public comments, etc., the comments received from Stakeholders and

received a response that the TORF Oversight Committee plans to confirm the validity of the revision, etc. of the definition and calculation method of TORF, as described in "QBS's Response."

the details of discussions with comment submitters, etc. based on those comments, are made public, unless the comment submitters request that they not be disclosed.

✓ As described in the response to Principle 10, for the Applicable Period, QBS has been working on the verification and review since October 2021, and the results are planned to be announced on its website by the end of February 2022 regardless of whether or not the definition and calculation method of TORF are changed.

[About c)]

For the Applicable Period, QBS does not use expert judgment.

[About d)]

QBS has established a "Contingency Plan for TORF Calculation and Publication" to determine the TORF calculation method in case of market stress or turmoil, or in the absence of data sources, and operates in accordance with the contingency plan.

• In the event of an emergency situation that makes it difficult to perform TORF

[About c)]

DTTL inquired of the person in charge, and received a response that for the Applicable Period, expert judgment was not used.

[About d)]

DTTL reviewed the "Contingency Plan for TORF Calculation and Publication," and confirmed that the method for determining the TORF calculation in times of market stress or turmoil, or the absence of data sources, is as described in "QBS's Response."

In addition, DTTL inquired of the person in

calculations at the QBS Head Office, QBS employees stationed at the QUICK NISHI-NIHON Regional Office assume this role.

- Notwithstanding in the event of excessive market stress, QBS shall in principle carry out its TORF calculation and publication operations.
- If the number of Reporting Brokers is less than two in case of market stress, the Official Rate of the previous day is used as the rate of the day.
- In the event that it is deemed appropriate
 to suspend the TORF publication in case of
 a wide-area disaster, the Official Rate of
 the previous day is used as the rate for that
 day according to a predetermined
 procedure.

✓ For the Applicable Period, there was no matter applicable to the above.

that the list of selected Reporting Brokers was published.

In addition, DTTL inquired of the person in charge, and received a response that no applications were received for the call for new TORF Reporting Broker selection for FY2022.

12. Changes to the Methodology

An Administrator should Publish or Make Available the rationale of any proposed material change in its Methodology, and procedures for making such changes. These procedures should clearly define what constitutes a material change, and the method and timing for consulting or notifying Subscribers (and other Stakeholders where appropriate, taking into account the breadth and depth of the Benchmark's use) of changes.

Those procedures should be consistent with the overriding objective that an Administrator must ensure the continued integrity of its Benchmark determinations.

When changes are proposed, the Administrator should specify exactly what these changes entail and when they are intended to apply.

In order to ensure that the TORF remains integrity as a financial benchmark, QBS has established procedures in the "TORF Operational Rules" to periodically review changes in the definition and calculation method of TORF. Regardless of whether there are any changes in the definition or calculation method of TORF, the results of the review are announced on its website.

For the Applicable Period, as described in the response to Principle 10, QBS started reviewing from October 2021, and plans to announce the results by the end of February 2022.

In addition, the "TORF Operational Rules" also stipulate the procedures to be followed when a change to the definition and the calculation method of TORF is deemed to be a material change (i.e., a change that is reasonably DTTL reviewed the "TORF Operational Rules" and confirmed that the procedures for periodically reviewing changes in the definition and calculation method of TORF have been established.

In addition, DTTL inquired of the person in charge and received a response that TORF Oversight Committee plans to confirm the validity of the revision, etc. of the definition and calculation method of TORF, as described in "QBS's Response."

DTTL reviewed the "TORF Operational Rules" and confirmed that the procedures are in place for the cases when it is determined that a change in the definition and calculation method of TORF constitutes a material change.

The Administrator should specify how changes to the Methodology will be scrutinised, by the oversight function.

The Administrator should develop Stakeholder consultation procedures in relation to changes to the Methodology that are deemed material by the oversight function, and that are appropriate and proportionate to the breadth and depth of the Benchmark's use and the nature of the Stakeholders. Procedures should:

- a) Provide advance notice and a clear timeframe that gives Stakeholders sufficient opportunity to analyse and comment on the impact of such proposed material changes, having regard to the Administrator's assessment of the overall circumstances; and
- b) Provide for Stakeholders' summary comments, and the Administrator's summary response to those comments, to be made accessible to all Stakeholders after any given consultation period, except where the commenter has requested confidentiality.

expected to significantly alter the homogeneity of the TORF before the change or significantly affect the level of TORF rates).

In reviewing and deciding on such changes, QBS shall, to the utmost extent, reflect an objective of ensuring the continued soundness of the determination of TORF, taking into account the impact of the changes on financial and economic stability, as well as the scope of the referenced contracts and the degree of impact on them.

[About a)]

In seeking public comment, QBS shall allow a sufficient period so that stakeholders, such as Subscribers, can make full discussions.

✓ For the Applicable Period, there was no matter applicable to the above.

[About b)]

In the event that the definition and calculation method, etc. of TORF, are to be changed, the specific details of the change, the reason for the change, the comments received from Stakeholders through the public comments in the preceding paragraph, the details of consultations with commenters, etc. based on the comments (except in cases where the

[About a)]

DTTL reviewed the "TORF Operational Rules" and confirmed that, when public comments are sought, the procedures are stipulated as described in "QBS's Response."

In addition, DTTL inquired of the person in charge, and received a response that for the Applicable Period, no public comments were sought.

[About b)]

DTTL reviewed the "TORF Code of Conduct" and confirmed that it is set forth as described in "QBS's Response."

[About e)]

DTTL reviewed the "TORF Code of Conduct" and confirmed that it provides for Reporting Brokers to cooperate with inquiries and investigations related to rate reporting.

DTTL also reviewed the "TORF Operational Rules" and confirmed that it stipulates the procedures for the withdrawal of Reporting Brokers.

[About f)]

DTTL reviewed the "TORF Code of Conduct" and confirmed that it is set forth as described in "OBS's Response."

eligible inputs, in line with the Administrator's Methodologies;

- ii. Procedures to detect and evaluate suspicious inputs or transactions, including inter-group transactions, and to ensure the Bona Fide nature of such inputs, where appropriate;
- iii. Policies guiding and detailing the use of Expert Judgment, including documentation requirements;
- iv. Record keeping policies;
- v. Pre-Submission validation of inputs, and procedures for multiple reviews by senior staff to check inputs;
- vi. Training, including training with respect to any relevant regulation(covering Benchmark regulation or any market abuse regime);
- vii. Suspicious Submission reporting;
- viii. Roles and responsibilities of key personnel and accountability lines;
- ix. Internal sign off procedures by management for submitting inputs;
- x. Whistle blowing policies (in line with Principle 4); and
- xi. Conflicts of interest procedures and policies, including prohibitions on the Submission of data from Front Office Functions unless the Administrator is satisfied

[About g)]

The "TORF Code of Conduct" stipulates the development of each of the following systems.

- Conducting internal audits to confirm the appropriateness of reporting rates and compliance with the Code of Conduct
- Establishment of processes to enable postreporting explanations on reporting rates
- •Retention of communication records regarding rate reporting for five years
- Conducted internal training on the "TORF Code of Conduct"
- ✓ For the Applicable Period, as described in the response to Principle 2, an internal audit by a Reporting Broker were requested in October 2021, and the TORF Oversight Committee plans to confirm compliance with the Code of Conduct by the end of February 2022.

[About g)]

DTTL reviewed the "TORF Code of Conduct" and confirmed that it is set forth as described in "QBS's Response."

DTTL inquired of the person in charge, and received a response that QBS plans to respond as described in "QBS's Response" about the status of compliance with the Code of Conduct for Reporting Brokers.

that there are adequate internal oversight and verification procedures for Front Office Function Submissions of data to an Administrator (including safeguards and supervision to address possible conflicts of interests as per paragraphs (v) and (ix) above), the physical separation of employees and reporting lines where appropriate, the consideration of how to identify, disclose, manage, mitigate and avoid existing or potential incentives to manipulate or otherwise influence data inputs (whether or not in order to influence the Benchmark levels), including, without limitation, through appropriate remuneration policies and by effectively addressing conflicts of interest which may exist between the Submitter's Submission activities (including all staff who perform or otherwise participate in Benchmark Submission responsibilities), and any other business of the Submitter or of any of its affiliates or any of their respective clients or customers. 15. Internal Controls over Data Collection QBS obtains the data necessary to calculate For internal control over the collection of data When an Administrator collects data from any external source the Administrator should ensure TORF from each Reporting Broker. As described from Reporting Brokers, see "DTTL Procedures" that there are appropriate internal controls over in Response to Principle 2, Principle 3, Principle in Principles 2 through 4 and Principle 10. its data collection and transmission processes. 4, and Principle 10, QBS has established internal

These controls should address the process for selecting the source, collecting the data and protecting the integrity and confidentiality of the data. Where Administrators receive data from employees of the Front Office Function, the Administrator should seek corroborating data from other sources.

control over data collection. The specifics are as follows.

- Both the rate reporting system from the Reporting Brokers and the TORF calculation system are duplexed. Procedures to deal with problems are established, and failure training is conducted.
- In order to maintain the quality and integrity of TORF, in addition to checking data at regular points in the daily calculation process using the system, the calculation staff and the authorizer on the day of calculation check the operating status of the system, receive files, and check for deviations from the values adopted the previous day, as described in Principle 3.
- QBS conducts regular monitoring of the reporting rate on a quarterly basis, and verify the validity of the Official Rate after the fact by collecting and analyzing basic data on the Japanese yen OIS market.
- As part of risk management for operational risk, etc., a backup system for checking the calculation process, which is independent from the TORF calculation system, is always in operation, and the person in

	charge of the calculation work checks both	
	systems. In addition, access to the TORF	
	calculation and publication system is	
	limited to those in charge of calculation	
	operations and system administrators, and	
	a system for appropriate management has	
	been established.	
Accountability

investigating a complaint made about the Administrator's Benchmark determination process on a timely and fair basis by personnel who are independent of any personnel who may be or may have been involved in the subject of the complaint, advising the complainant and other relevant parties of the outcome of its investigation within a reasonable period and retaining all records concerning complaints;

- c) Contain a process for escalating complaints, as appropriate, to the Administrator's governance body; and
- d) Require all documents relating to a complaint, including those submitted by the complainant as well as the Administrator's own record, to be retained for a minimum of five years, subject to applicable national legal or regulatory requirements.

Disputes about a Benchmarking determination, which are not formal complaints, should be resolved by the Administrator by reference to its standard appropriate procedures. If a complaint results in a change in a Benchmark determination, that should be Published or Made Available to Subscribers and Published or

[About b)]

The "Complaints Consultation Management Rule of TORF" stipulates a system to ensure independence in investigating complaints and consultations by, depending on the nature of the complaint or consultation, excluding the person in charge of the complaint or consultation from the person conducting the investigation.

[About c)]

The Oversight Committee Office, which has established a complaint and consultation desk, checks the content, facts, and response measures of complaints and consultations received, classifies them into complaints and consultations, and reports the results to the TORF Oversight Committee on a regular basis. The TORF Oversight Committee reviews the content of the reported complaints and consultations and the status of the response and, if necessary, recommends to the Board of Directors the necessary actions, including the commissioning of a review of benchmarks to an external organization.

and consultations, as well as the status of responses to such complaints and consultations, shall be recorded and stored together with related materials for five years.

✓ For the Applicable Period, there were no complaints or appeals regarding the operation of TORF or the Official Rates, etc. Inquiries and consultations regarding TORF are responded to on an individual basis.

Management Rule of TORF" and confirmed that they are set forth as described in "QBS's Response."

In addition, DTTL inquired of the person in charge, and received a response that for the Applicable Period, the confirmation of external opinions, such as responses to complaints and consultations, is as described in "QBS's Response."

17. Audits

Administrator should appoint independent internal or external auditor with appropriate experience and capability to periodically review and report on the Administrator's adherence to its stated criteria and with the Principles. The frequency of audits should be proportionate to the size and complexity of the Administrator's operations. Where appropriate to the level of existing or potential conflicts of interest identified by the Administrator (except for Benchmarks that are otherwise regulated or supervised by a National Authority other than a relevant Regulatory Authority), an Administrator should appoint an independent external auditor with appropriate experience and capability to periodically review and report on the Administrator's adherence to

On an annual basis, in principle, QBS shall be subject to internal audits, and external audits by an independent auditor with adequate experience and abilities, on the execution of the TORF calculation and publication operations, establishment of processes/procedures required under the "TORF Operational Rules," and on the review of the TORF administration framework (including reviewing the definitions and calculation methods). For the Applicable Period, QBS conducted an internal audit and reported to the TORF Oversight Committee that no matters were found that would materially affect the operation of the TORF calculation. DTTL was appointed as the external auditor to perform the external assurance engagements for the year.

DTTL reviewed the "TORF Operational Rules" and confirmed that the rules are set forth as described in "QBS's Response."

DTTL also reviewed the TORF Oversight Committee minutes and confirmed that the internal audit results were reported.

The Independent Assurance Report is provided in Section 3.
